

# Track Your Employee Efficiently

em tracker

## An Exemplary App for Monitoring Employees

We are introducing an efficient system to audit the payroll of each employee in a company. With this app and back-end an employer or HR to assign jobs to any location. So employer can track the employees whether he/she is present in that location or not. This app is also used for attendance purposes such as group punch-in, offline punch-in, biometric punch-in and many more.

## Features

- Office punch-in and punch-out
- Day based/ Job based punch-in/punch-out
- Location based punch-out mode
- Real-time employee tracking
- Attendance reporting
- Late punch-out request
- Job duration
- Group punch-in and punch-out
- Offline group punch-in and punch-out
- Chat facility
- API integration

And Many more

## Biometric Punch-in / out

EM tracker has using the Biometric uniqueness to identify each employee. We are using thump impression for biometric identification. With a small extension of biometric scanner extension we can make the same EM tracker as biometric attendance system. It is also easy to transport; no need any additional technical support to move. Also we are providing Biometric extension who needed that.

## Live Tracking

Get know your employees current position with EM tracker. EM tracker provides a facility to track your employees lively. We don't need any extra gadgets for that. It is embedded inside to our app. Also we get history of each employees locations at particular time. With this feature you can monitor your employee efficiently. By adding google maps additional features make the monitoring very effective.

## Group Punch-in / out

Using this facility we can arrange employees as group and assign jobs to that group. Not only that but also we can punch-in through one login (group leaders login). When group leader logins with his credentials he can see his group members. And all team members can punch-in or out with his credentials. Group leader can also send leave request, late punch-in request for employees.

## Vehicle Tracking

Do you want to track your company vehicles too. EM tracker provides tracker not only employees but also vehicles too. EM tracker exclusive GPS device will integrate your vehicle, thus you will get the accurate position of your vehicle at a particular point of time. Also we provides route history of that vehicle. Vehicles speed and fuel status will be add-on to our application.
